Experience Matters

Q3 Asset Management was founded by professional traders. Our focus is to give retail investors the same cutting edge, actively managed investment strategies used by institutional investors. We have deep roots in portfolio management and technical analysis. We believe our background, coupled with our expertise in quantitative investing, gives us an advantage over traditional methods of money management.

Our strategies are designed to capitalize on the strongest market opportunities and eliminate emotion from the investment process.

Why Q3?

Few investors have the knowledge, emotional discipline, or time needed to manage their investments effectively. Q3 Asset Management attempts to eliminate these barriers to prudent portfolio management by working with investment professionals to offer actively-managed portfolios for individual investors. Our objective is not necessarily to outperform the market each year, but to construct a portfolio that posts consistent returns through both positive and negative environments.

Q3's proprietary strategies are available on retirement accounts, individual accounts and variable annuities.
