

# Tactical Unconstrained Growth

Investment Style:

Tactical

Risk Profiles:

Moderate Growth Aggressive

Invests In:

NASDAQ 100 | Bonds | Money Market

## Tactically Balancing Risk & Reward

An actively managed investment strategy that seeks a positive rate of return over a calendar year regardless of market conditions.

### Active Approach

Markets can be volatile; your investments should be responsive. Tactical Unconstrained Growth offers active management, reviewed daily, to navigate dynamic market conditions.

### Reduced Risk

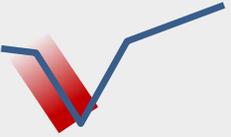

Tactical Unconstrained Growth was designed for investors that understand the importance of risk management. Reducing downside risk is at the forefront of the strategy's objective.

### All-Weather

At its core, all-weather investing separates itself from traditional methods of investing in that it strives to add value during both favorable and unfavorable economic and market conditions.

## Investment Process

Market Condition	Determined By...	Positions
<b>Bull Market</b> 	Stock market is clearly trending in a positive direction	100% Equity
<b>Recovering Market</b> 	Stock market trend is strengthening to the upside	Blend of Equity and Fixed Income
<b>Bear Market</b> 	Negatively trending stock market with short-term moving averages falling below long-term averages	100% Fixed Income

## OBJECTIVE

A positive rate of return over a calendar year regardless of market conditions.

## SUMMARY

The Tactical Unconstrained Growth strategy adapts to changing markets by tilting back and forth between equity and fixed income (or money market) depending on the equity market's direction. Relying on a proprietary algorithm to recognize changing trends, the strategy can actively adjust to bull, bear, and flat market conditions.

## PLATFORMS

E*Trade Advisor	Adhesion
TD Ameritrade	Orion/FTJ
Schwab	Envestnet
Folio	Sawtooth

*There is no assurance that the strategy will achieve its investment objective.*

## About Q3

Q3 Asset Management's roots trace back to 1982 when Bradford Giaimo began his career in the COMEX Gold Pit. In 1984, Brad was recruited to work for Paul Tudor Jones, where he learned the importance of "risk control" from someone considered by many to be one of the greatest money managers of the modern era. At the end of 1986 he took the lessons he'd learned and applied them as an independent member of the NYBOT, where he would spend the next 13 years refining the skills and concepts that he brings to Q3 Asset Management.

Q3 has been providing professional money management programs to investors since 2006. During that time, we have seen dramatic volatility and shifts in the market. These conditions are precisely why Q3 was founded – to help investors navigate the dynamic and demanding investment landscape with strategies that are responsive to changing investment environments. Our commitment remains the same as it did at our founding, to design strategies with one goal, to attempt to protect investors from severe losses in down markets while providing quality participation in rising markets.

## Important Risk Information

Please review individual research reports for detailed descriptions and disclosures. Past performance is not indicative of future results. There is no assurance objectives will be realized. There is a risk of loss with all of Q3 Asset Management's investment strategies. For a list of all recommendations made in the preceding twelve months please contact our office directly. No graph, chart, formula or other device can, in and of itself, be used to determine which securities to buy or sell, or when to buy or sell such securities, or can assist persons in making those decisions. All prospective clients must review our ADV II prior to investing.
